What Is

The EDISON MIMEOGRAPH? It is not a talking machine, yet it can talkon paper. There is no electricity about it but it will reduplicate letters, music, programmes, drawings, etc., with lightning rapidity. It is simple, compact, cleanly and cheap. Nothing to get out of order as in some machines. You can take 3000 copies of your own handwriting, or, if a type writer is used, 1500 duplicates, each as good as the original. Every busy man should have one. The circular letter which you send out from your office will look like a personal one and the recipient will read it. All nsers on these islands endorse it.

How much do they cost? That depends on the size. A small machine \$15, and \$22 will buy a mimeograph 9x12 inches, suitable for general work. They are fitted out completely, with paper and ink ready for operating.
